UNIT PROFILE

The Mattupatti semen station was established in the year 1963 under the erst-while Indo-Swiss project, Kerala. It is now under the Kerala Livestock Development Board Ltd., a fully owned Government of Kerala Undertaking. The station produces frozen semen from exotic HF, Jersey and Crossbred Sunandini bulls. The bulls conform to pedigree standards put forth by the Govt. of India in the Minimum Standards Protocol for Semen Stations in India. All the bulls are having normal karyotype and free from genetic diseases. Annual disease screening of breeding bulls is done by Southern Regional Disease Diagnostic Laboratory (SRDDL), Hebbal, Bangalore. The bulls are vaccinated against Foot & mouth disease (once in 3 months), H.S. (annually) and Theileriosis (once in lifetime). The station is ISO 9001-2015 certified.

The unit has an annual production capacity of 2 million doses of frozen semen.
